APEX MOTORS INC.

# FY2025 Market & Product Report

Industry positioning, product specifications, and competitive analysis

Austin, Texas • Founded 2015 • 1,240 Employees

*Prepared by the Apex Motors Strategy & Market Research team for internal and partner distribution.*

# Market Analysis

The North American light-vehicle market grew at a mid-single-digit pace in 2025, but Apex Motors significantly outpaced the industry. Over the past five years, Apex's sales index nearly doubled while the broader industry grew by less than half that rate, reflecting share gains driven by the SUV Trailblazer launch and steady expansion of the EV Volt-X line.

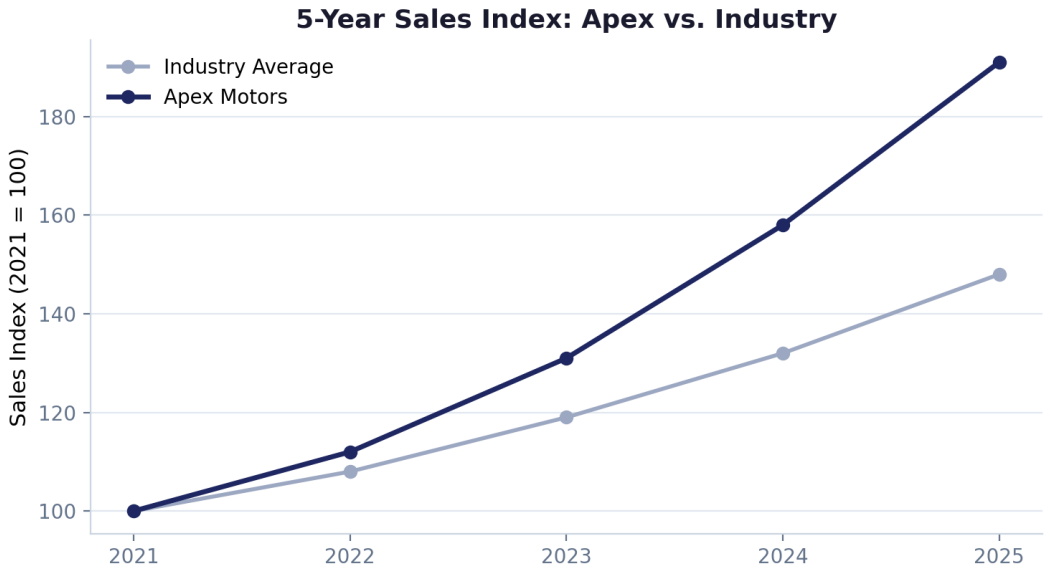

*Figure 1. Five-year sales index, Apex Motors vs. industry average (2021 = 100).*

## Key Market Drivers

• Continued consumer shift toward SUVs and crossovers, where Apex holds its strongest model (Trailblazer).

• Gradual but accelerating EV adoption, supporting double-digit growth in Volt-X reservations.

• Regional population growth in the South, reinforcing Apex's largest existing dealer network.

• Rising average transaction prices industry-wide, consistent with Apex's FY2025 mix shift toward higher-margin models.

# Product Catalog

Apex Motors offers five model lines spanning sedan, SUV, pickup truck, electric hatchback, and coupe body styles. Specifications and FY2025 starting prices for each model are summarized below.

**Apex Sedan LX**
Sedan
Starting at $32,500
FY2025 units sold: 4,820

**Apex SUV Trailblazer**
SUV
Starting at $41,200
FY2025 units sold: 5,640

**Apex Truck Workhorse**
Pickup Truck
Starting at $44,800
FY2025 units sold: 2,910

**Apex EV Volt-X**
Electric Hatchback
Starting at $46,900
FY2025 units sold: 1,850

**Apex Coupe Spark**
Coupe
Starting at $35,600
FY2025 units sold: 850

# Competitive Landscape

Apex Motors competes most directly with Veltrix Auto, Horizon Motor Co., and Sterling Drive across the volume segment. Apex's average transaction price sits below premium competitor Horizon while maintaining the industry's second-highest customer satisfaction score.

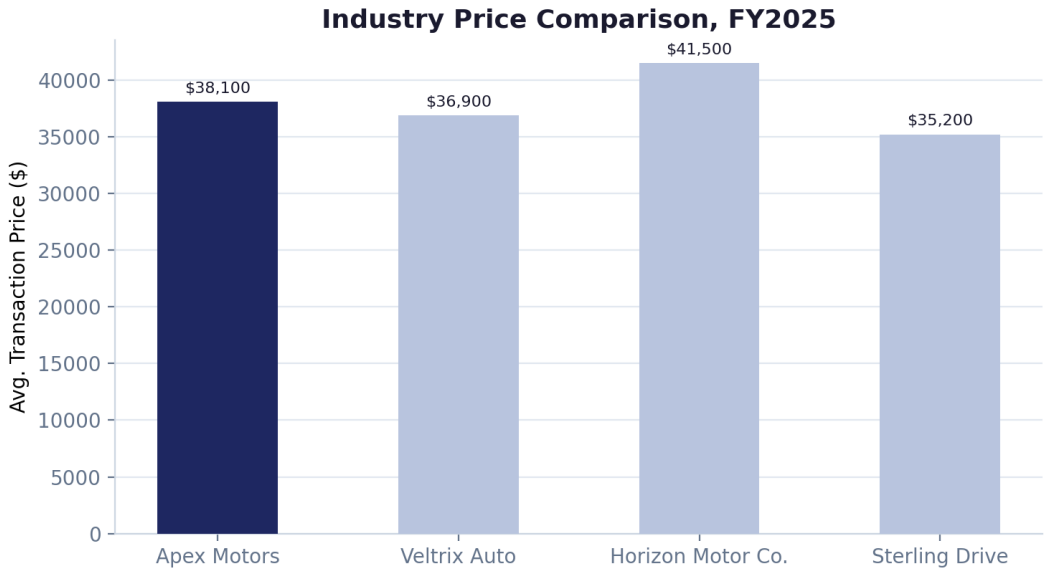

*Figure 2. Average transaction price by manufacturer, FY2025.*

| Manufacturer | Avg. Price (USD) | CSAT (out of 5) | EV Share of Sales |
|---|---|---|---|
| Apex Motors | $38,100 | 4.6 | 11.5% |
| Veltrix Auto | $36,900 | 4.2 | 6.0% |
| Horizon Motor Co. | $41,500 | 4.4 | 14.0% |
| Sterling Drive | $35,200 | 4.0 | 3.5% |

# Inventory Snapshot

As of October 31, 2025, current stock for the Apex EV Volt-X and Apex Coupe Spark sits closest to reorder thresholds, reflecting strong demand relative to production pace. Manufacturing has scheduled additional Volt-X production capacity for FY2026 to address this gap.

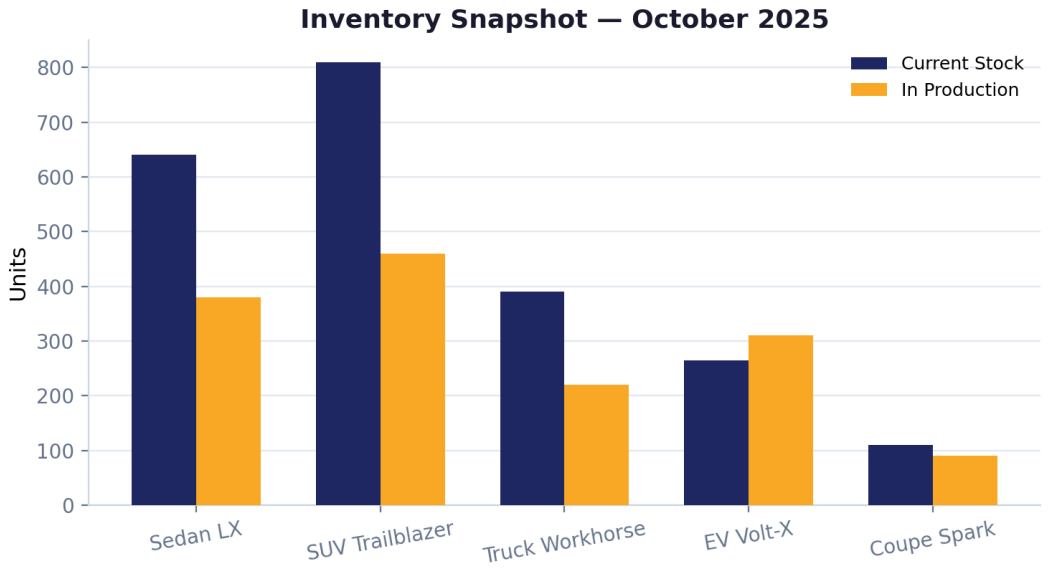

*Figure 3. Current stock vs. units in production by model, October 2025.*

## Conclusion

Apex Motors enters FY2026 from a position of strength: revenue and unit sales grew every quarter of FY2025, the product lineup outperformed the broader industry, and customer satisfaction remained among the highest in the segment. Continued investment in EV production capacity and regional expansion, particularly in the East, are expected to sustain this momentum into the coming year.
